

LUKE SLAUTTERBACK

Weston FL, 33331 | (954) 716-1142 | lukeslautterback@gmail.com | [LinkedIn](#) | [GitHub](#)

CAREER SUMMARY

Results-driven software developer with hands-on experience designing and building 100+ Python-based automation tools and applications that drive efficiency and real business impact. Recent projects helped save over \$100K annually and are now contributing to a projected \$10 million increase in yearly revenue by enabling the company to onboard larger clients.

EDUCATION

Bachelor of Arts in Computer Science Florida International University	08 / 2024 Miami, FL
Associate of Arts Broward College	05 / 2022 Fort Lauderdale, FL

SKILLS

Languages & Scripting: Python, Java, C++, SQL, Bash
Frameworks & Libraries: Django, Flask, FastAPI, Qt6, Pandas, SQLAlchemy, Celery, PyMuPDF (Fitz), PyTorch
Cloud & APIs: AWS (ECS, RDS, S3), Microsoft Azure (Graph API, Key Vault, Blob Storage, Cognitive Services), Google Cloud (Document AI)
Databases: MySQL, PostgreSQL, SQL Server
DevOps & Tools: Git, GitHub Actions (CI/CD), Docker, Application Insights, ClickUp
AI & Automation: NLP (spaCy, regex), Speech-to-Text (Whisper, Azure Cognitive Services), GPT-5 integration, Automation Scripting
Web Technologies: HTML5, CSS3, REST APIs

PROFESSIONAL EXPERIENCE

Software Developer RAS LAVRAR	04/2023 – Current Plantation, FL
Owned mission-critical AI and automation projects end-to-end (discovery, scoping, rollout, stabilization), meeting SLAs and ensuring full auditability. Shipped a call summary assistant using speech-to-text (Azure Cognitive Services / Whisper) with GPT-5 summarization, deployed via Python microservices with SQL backend, reducing call center wrap-up time by 35%. Engineered an automated email intake system by integrating the Microsoft Graph API (Azure) to retrieve emails, leveraging Google Document AI for intelligent parsing and classification, and implementing a SQL-based database to store, track, and route client communications. Built an attorney review application using Qt6 for the desktop interface, SQL for file intake and processing tracking, Fitz (PyMuPDF) for automated document redaction and signing, and a Python server-side processing script to handle background tasks and database communication. Developed and maintained 100+ Python automation tools to streamline internal workflows, leveraging Pandas for data manipulation and SQL for database interactions, reducing manual workload across departments.	

- **Automated document generation and reporting processes** with **Python**, **Jinja2 templating**, and **PDF libraries**, cutting turnaround times from days to minutes.
- **Deployed scalable backend applications** using **Docker containers on AWS ECS** and implemented **CI/CD pipelines with GitHub Actions**, improving deployment reliability and reducing downtime.
- **Integrated Microsoft Azure services** (Key Vault, Blob Storage) to manage sensitive client data securely and comply with data privacy standards.
- **Collaborated with cross-functional teams** (attorneys, paralegals, and IT staff) to gather requirements and translate business needs into technical solutions, following **Agile methodology with ClickUp and Git for version control**.

CERTIFICATIONS

- **Career Essentials in GitHub Professional Certificate – GitHub (Sep 2025)**
Demonstrated proficiency in **GitHub version control, branching strategies, pull requests, and collaborative workflows** for professional software development.
- **Career Essentials in Software Development – Microsoft & LinkedIn (Sep 2025)**
Gained strong foundation in **software engineering principles, programming best practices, and SDLC methodologies**, with emphasis on scalable, maintainable code.
- **Docker Foundations Professional Certificate – Docker, Inc (Sep 2025)**
Certified in **containerization concepts, Docker CLI, image creation, networking, and orchestration**, enabling deployment of scalable applications.
- **Python Data Structures and Algorithms – LinkedIn (Sep 2025)**
Applied **data structures (lists, stacks, queues, trees, graphs)** and **algorithmic problem-solving techniques** using **Python** for optimized solutions.
- **Advanced Python – LinkedIn (Aug 2025)**
Mastered advanced **Python programming patterns**, including **decorators, generators, OOP principles, and error handling** for building robust applications.
- **Business Specialist – Broward College (May 2022)**
Completed coursework in **business operations, management, and organizational practices**, providing cross-functional knowledge alongside technical expertise.

AWARDS AND HACKATHONS

- | | |
|--|----------|
| • PlutoHacks, Broward College | Dec 2024 |
| • ShellHacks, Florida International University | Sep 2025 |

LANGUAGES

- English, Fluent
